Introduction

Increasing concerns expressed for the quality of food, contamination due to chemicals, serious health hazards and environmental issues have given rise to new consumer demands for “Safe and Healthy Food”. This new demand has forced almost all large, medium and retail chains to create new relations, now popularly known as organic food section with the enactment of laws and legislations by most of the countries, organic food has acquired new status and is now also being labeled as “Value Added Products” as compared to normal and conventionally produced food products.

The organic philosophy, standard and practices while on one hand restrict the use of chemicals and external inputs, on other hand it requires on farm input production, recycling, diversity of activities, micro level management of farm activities for any product to qualify as certified organic produce and above all very high levels of record maintenance of farm activities.

To meet ever increasing demand for organic/quality food and medicine in India as well as abroad, a trained human resources are required to run the agribusiness related organic products. The skilled man power trained in organic agriculture is not available to work at grass root in villages.

Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola has designed a new curriculum in organic agriculture to provide new avenues in HRD for management sector and sustainable establishment of eco-friendly farming system.

Objectives

The main objectives of the certificate course in organic agriculture are to:

- Impart knowledge and proficiency in organic agriculture
- Develop manpower having technical skills in organic farming
- Certification process and marketing of organically raised agricultural produces
